

## Just To Love

One Day You'll Feel stupid 'bout thinking you're so smart  
You set yourself up when you set yourself apart.  
You lined your friends up one by one and shot 'em down  
When was the last time a good friend just came around  
Just to see you  
Just to be seen  
Just to Love You  
Hear 'bout your dreams

You say I should not give my faith and trust away  
You lecture me on how to listen what you say  
It's people like you that have ripped the world in two  
Who preach like Jesus when it's only about you  
(Chorus)

You don't know what it's like really live in peace  
You'd feel much better if you found some release  
You should shout at a stone. At lest you'd be alone  
to be a dick and not hurt hippie dudes like me  
Hippie Dudes don't bother you  
Cause we got higher things to do  
Why won't you eat shrooms too?  
Then you 'd see without your eyes  
How I love you.

Your hippieness ain't in your long long hair  
Your godliness ain't in your Kevlar underwear  
Your happiness won't come from any other zone  
So pack it up and leave your daddy's fucked up home  
"round here we've learned to forgive  
We've got one life to live

It scares me you won't leave your home  
It terrifies me you'd try to die alone  
So let's all get together with our clothes off.  
Yeah we'll walk right through the woods and trip our toes off  
Like some funky astronauts right after lift off  
Yeah we'll tune that bitter heart to the honey flow

Just to see you  
Just to be seen  
Just to Love You  
Hear 'bout your dreams  
Just to be seen  
Just to love you  
Just to be loved  
Though I ain't like you  
One Day You'll Feel stupid 'bout thinking you're so smart  
You set yourself up when you set yourself apart  
It's people like you that have ripped the world in two  
Who preach like Jesus when it's only about you

## Care Free Livin'

Care Free Livin'  
I wish for it upon you  
Care Free Givin'  
You don't care much who you give to.  
Easy Ridin'  
And may your fast care never crash  
Highway glidin'  
In the land of endless cash  
Care Free Livin'  
Care Free Livin'  
Care Free Livin'  
Care Free Livin'  
Care Free...  
People you know we get uptight and  
we don't know what to do.  
If the TV newsman had his way,

you'd have new eyes installed behind you.  
Things that bump, bight in the night  
make you want to by a magic potion.  
If you stay inside and terrified...  
don't that predict the outcome.  
Baby take care you don't loose your social standing.  
Baby take care you don't loose your hand to hold.  
Baby take care adult life is too demanding.  
Baby take care on the subway with all that gold.  
Stolen and sold (for some)-  
(Chorus)

Where is the time to do the things you want?  
Where is the time to do the things you don't?  
Where is the time?  
Time to get a little bit o'  
(Chorus)

## Life

Life Wouldn't be so hard,  
If you'd try to find a little life.  
Night wouldn't scare you so  
If you'd take it in and let it go.  
Well you ain't the first to be here  
And be sure that there's more to come  
You know you ain't the worst I seen here.  
So stop your crying and get up  
For you know that there's work to be done.  
Plenty work to be done..

Time wouldn't run so fast  
If you'd give yourself a little time.  
I wouldn't seem so strange  
If you'd let this stranger in your life

When it's all falling down  
And your scared that it just won't work out  
When that shit comes around...  
Well I been knocked down so many time now  
I lost count.  
And all I know is that...  
Life wouldn't kick so hard  
If you'd kick back a little at your life  
Wouldn't scare you so  
If you'd just admit it and let it go.

## Dirty Dawn

In the morning while you sleepin'  
We is up with the dirty dawn.  
We saw the moonrise,  
We rode the nighttime,  
Rode that dark water to the sun  
Anybody who asks you where we been?  
In to the grassy knoll we been sinkin'.  
Been talking to the dead and the livin'.  
Been catchin' up on what we been missin'.

They done stole from me.  
They kicked and raped me.  
Ran to me when they felt the rain.  
Now trouble come 'round.  
Naked, you get down  
And beg me to forgive my pain.  
Anybody who asks you who I am?  
I'm the bone in your back the makes you stand.

And if you run to the hills to find relief  
Don't be surprised if they crumble down beneath.  
Don't be surprised if they crumble down beneath.

Well I been put down.  
Tarnish on my crown.  
And they tried to turn the truth in to a joke.  
But he who knows me  
and freely chose me,  
Know I'm the last time your heart awoke.  
Anybody who asks what I just said?  
They ain't got no two good ears upside their head.  
You who think you know why do you talk?  
Honey you who think you there? You better stand and walk  
walk.

Well I been cut up,  
Packed in the big truck.  
And you find me most every place.  
You think you know me?  
You think you own me.  
But you only seen a piece of my face.  
Anybody who claims that they the one.  
Can they tell you what it's like to light the sun?  
Well, well, the peace that you buy  
Is just the crumbs of the pie  
When the whole damn feast is done.  
Well, well, the peace that you buy  
Is just the crumbs of the pie  
When the whole damn feast is done.

In the morning while you sleepin'  
We is up with the dirty dawn.

## Music Every Day

I was caught up in malfunctioning functioning  
I lost my head in some kinda dream  
I woke up and I found I was still thirsty.  
My numbers didn't add up  
and my clothes hung on my body  
like the secrets of a language  
once spoken now forgotten.  
And this mal-adjusted nugget  
Found himself tossed in the tumbler  
But the inside is the inside  
I just tumbled off the outside  
All is precious! Every grain of sand  
Is perfect in your perfect hand  
You're looking? You can stop;  
You're standing on it.

Sing Music Every Day  
Rode that dark water to the sun  
Every Day Every Day  
Sing to the day  
Music Every Day

She was many things,  
Most of them good.  
She'd rather buy something  
Than do what she should.  
She was bloating from starvation  
But her cupboards were never empty.  
And she was far away from help  
When she knocked her head  
On the rock-hard idea

That she'd conquer her tomorrows  
Without living for today.  
You can't fix it you can't stitch it  
But you heal if you want to.  
Our obstacles seem to dissolve then  
When we chase those chains away.  
Can she make it back home?  
Yeah, we hope so  
But our demons grow fat on our doubts,  
And there's no armor.  
Choose to Love and learn these lessons

(Chorus)

There's never been  
A tighter bind  
Could be the end  
Of human kind  
There's never been  
A better time  
To freak your freak  
And change your mind  
Don't hesitate  
Upon the dream  
Don't get lost in  
that TV screen  
Move the props and  
Change the scene  
There's music in  
Most everything.

(Chorus)

## What You Gonna Do? (Without Soul)

What you gonna do without soul?  
What you gonna do when you down in that hole?  
What you gonna do when a cold wind blow  
When you finally realize you done locked all your doors.  
(and you can't get out)  
What you gonna do without soul?  
When the curtain done come down on your show.  
When there ain't nobody left to tell that "I love You so"  
What you gonna do without soul?

Give back what you stole before it's too late.  
Let love in your Heart and don't let it wait  
You're living so high, people crying all the while  
And all of your money, and all of your style  
Don't mean nothin' if you ain't got soul.

You know life is a dangerous gamble  
when everything you do could turn out to be a black hole.  
Today corners and turns and flames that will burn  
is just about all that we know.  
But people we're still alive  
and that's something we just can't let go (please)  
"cause you ain't got nothing if you ain't got soul  
If you not careful you can sell away your soul.  
If you not careful you could drink away your soul.  
If you not careful you could give away your soul.  
Don't give it away (ad lib)  
Sell it away  
Throw it away  
Chuck it away

Don't Give it away  
Sell it away  
Throw it away  
Kiss it away.

## Girl

Bromley/Holmberg

Maybe Planets share no secrets  
Maybe passion's lost in space  
Sensation has no set  
And the morning's out of place

But Girl you were born  
Wild and laughingly  
From a picture torn  
A picture none can see

So maybe time can talk  
And distance never lies  
And baby, when we walk  
The world around us flies

But Girl you were born  
Serious and suspectingly  
From a nothing torn  
A nothing all must see  
A nothing all must see

## I should

I should learn to call people back  
In this century  
Before the weekend ends  
Before they change address.

I should try to write that guy  
Before my pen runs out  
Before time runs out  
To be a friend.

But I'm just one of those who's got his hands full.  
Runnin' round this crazy city with my plans full.  
And its been this way every day since high school,  
Which was the last time I had a chance to call.

I should go for acupuncture  
In the village  
Because my neck hurts,  
But it really hurts  
That it costs so much to go.

I should try to do the network  
So I could get work  
And not be broke  
So I could buy stuff  
To help me network.

And we'd all pull together as a team.  
And we'd feel real good about the good we mean.  
And we'd make a funky tribe of those who know me.  
And we'd tell all the folks who can't get high to "blow me".

I should watch that TV show  
While its on air  
They say I'm on there  
Looking like my mommy in a dress.

It was on, but I was at work  
On that network  
Trying to get work  
So I can tell my friends.

## Rainbow

There's a rainbow over me  
There's a rainbow over me  
Feeling strong, can't do no wrong  
You can tell by the away I sing my song  
There's a rainbow over me

There's a diamond in my heart  
There's a diamond in my hear  
Been doused in wine and city slime  
But ain't nothin' stop that diamond shine  
There's a diamond in my heart

There's a ring around the moon  
There's a ring around the moon  
I thought my horse had run it's race  
But my baby girl she saw my face (and said)  
There's a ring around the moon

There's a note from the almighty  
"Dropped by but you were out.  
And I just came by to see  
What all the singin's all about.  
I'm guessing you found out that  
There's a rainbow over you."

There's a light inside of you  
There's a light inside of you  
Fall down, low down, right in a hole  
But you just can't kill that light you know  
There's a light inside of you  
There's a diamond  
There's a rainbow  
There's a light on  
There's a moon glow  
There's a rainbow over me

Theres a secret in our hearts  
that can blow this world apart  
There's a rainbow over me.
